Lead Software Engineer with 9 years of comprehensive experience designing and delivering scalable data solutions across Data Engineering, Business Intelligence, and Machine Learning. Currently driving BI and analytics transformation for a leading global motorcycle manufacturer's EMEA operations. Expert in architecting end-to-end data pipelines, implementing master data management systems, and building enterprise-grade analytics platforms using Microsoft Fabric, Databricks, AWS, PySpark, and Python.

Work Experience

UsefulBI Corporation

Bengaluru, Karnataka, India • 04/2021 - Present

Lead Software Engineer

- Designed and built end-to-end ETL pipelines using AWS Glue, Apache Airflow, PySpark, and Python, processing data from EDC systems and Salesforce to internal CDPs, enabling real-time data access and supporting scalable growth
- Led Microsoft Fabric implementation for a top-3 motorcycle manufacturer, migrating from Dataflow Gen1 to optimized Lakehouse architecture, reducing capacity consumption by 30% while enabling self-service analytics for 200+ users
- Architected and implemented enterprise MDM solution using Informatica MDM, standardizing and deduplicating millions of HCP and HCO records from multiple vendors, establishing a single source of truth with 70% data accuracy
- Developed a global data warehouse for a leading pharmaceutical client, enhancing clinical trial tracking and improving data accessibility within 6 months.
- Developed automated Power BI reporting solutions compiling data from multiple CRM tools and sources, creating financial dashboards serving 200+ users globally with real-time KPIs across six hierarchical levels optimized with RLS
- Led cross-functional teams of data engineers and analysts finalizing data architecture and governance strategies; collaborated with stakeholders to manage scope changes while maintaining delivery timelines and ensuring regulatory compliance
- Orchestrated multiple BI tool and dataflow migrations, implementing custom data partitions using Tabular Editor to handle large transactional datasets, ensuring seamless transitions and optimized system performance

Skills

Programming Languages

- DAX
- Power Query (M)
- PySpark
- Python
- R
- SQL

Cloud Platforms

- AWS
- Azure
- Databricks

Data Engineering

- Apache Airflow
- AWS Glue
- Azure Data Factory
- Databricks Unity Catalog
- Dataflow Gen2
- dbt (data build tool)

Business Intelligence & Visualization

- Alteryx
- AWS Athena
- Dash Plotly
- DAX Studio
- Power BI
- Redash
- R Shiny
- SSRS
- Tableau
- Tabular Editor

Benori Knowledge Solutions

Gurgaon, Haryana, India • 07/2018 - 03/2021

Senior Data Analyst

- Developed analytical plans and applied diverse measurement methodologies to address complex business questions and KPIs.
- Designed and implemented innovative solutions to manage missing or inconsistent data within datasets.
- Engineered web crawlers to automate secondary research processes, increasing efficiency and data accuracy.
- Prepared and presented comprehensive reports for executive leadership using advanced visualization tools, including Tableau and Power BI.

Times Internet (Taskbusks)

Gurgaon, India • 12/2016 - 07/2018

Data Analyst

- Developed an integrated dashboard using the SHINY package in R, consolidating reports, analyses, and visualizations.
- Managed campaign planning to effectively target audiences and maximize revenue.
- Automated daily reports on R Studio Server, reducing manual work by 1-2 hours each day.
- Collaborated with developers to enhance product efficiency and user-friendliness.

Certifications

Microsoft Certified: Fabric Analytics Engineer Associate

05/2026 - 05/2027

Microsoft

Data Science Career Track

01/2021 - Present

Springboard

AWS Partner: Accreditation (Technical)

03/2022 - Present

Amazon Web Services (AWS)

Education

Degree in Data Science Career Track

Springboard

01/2019 - 12/2020

Completed a rigorous 6-month Data Science Career Track featuring 650+ hours of hands-on training under personalized industry expert mentorship. Delivered two comprehensive capstone projects while building expertise in Python, SQL, data analysis, data visualization, hypothesis testing, and machine learning.

Bachelor of Technology - BTech in Electrical and Electronics Engineering

College of Engineering
Bhubaneswar - India

08/2011 - 07/2015
